Take a deep breath and another step, Preston. If you understand the concept: Guns don't kill people,

People kill people,

then you should realize that government isn't evil, just the people running multi-national corporations that run various governments are evil.

Centralized control of the economy is where freedom is most threatened and whether that control is exerted by government or by an interlocking collection of mega-corporations is immaterial. State socialism and corporate capitalism are the twin roads to serfdom, though the latter is high-speed.
